V-TOTEM

V-TOTEM is an interactive touch kiosk ideally suited for Digital Signage applications, for example in shopping malls, train stations or airports, hotel lobbies, etc. You can order kiosk in sizes: from 43" up to 75" that are best suited for this type of solution. For each totem we match proper PC and LCD depending on application. Optionally we can put you in touch with software developers who create a unique multi-touch apps.

All our totems are available in two basic tactile technologies:

Infrared technology
Key Features:

· Economic solution based on IR frame.
· Dedicated for public administration, corporate and other places with low traffic.
· Reliable and durable, provided that the sensors are kept clean.
· From 2 to 40 simlultaneous touch point recognition.

Projected Capacitive technology
Key Features:

· Smooth glass front with zero-bezel design.
· Waterproof and vandalproof ability.
· Dedicated for restaurants, shopping malls and other places with high traffic.
· 10 and 40 simultaneous touch point recognition.

CUSTOM TOUCH SCREEN SOLUTIONS ALL OVER THE WORLD

V-TOTEM **STANDARD**

A classic interactive totem that works best in hotels, town halls and digital signage applications.

Key features:

· LCD in portrait orientation with 24/7 operational time

· IR or PCAP touch screen technology

· Personalized steel case painted in any RAL color

· Your company's logo in the lower part and cut-out in side slats

Graphic personalization enlivens the appearance of a standard totem and makes it more visible in public places paying attention to the visual identity of your brand.

V-LECTERN

A multimedia kiosk in a horizontal orientation with a monitor tilted at the right angle to allow comfortable use for people of different height, as well as disabled people in wheelchairs. This solution is most often used in museums and shopping malls for WayFinder applications.

Key features:

· Screen in horizontal orientation
· IR and PCAP touch technologies available
· Housing customization possible
· Waterproof front in capacitive technology

V-TOTEM **CUSTOM**

Products from the CUSTOM group are created on special request according to the concept of the architects or our designers. This broad group of products is most often used in the modern museums, educational and scientific centers and other public facilities. They are characterized by a variety of shapes and high quality finishing materials such as Corian®, stainless steel, Corten steel (rust-coated in a controlled manner) as well as glass and wood. From the early stage we participate in the concept presentation, product visualization as well as executive documentation necessary in public procurements.

For private investors we make more and more popular showroom exhibitions where strong emphasis is placed on the so-called WOW factor. Custom kiosks and totems stand out from the competition, improve the quality of the presented products or services and support sales. Chosing dedicated products, you transform a typical presentation and sales process into an unforgettable experience which stays in the heads of your clients for a long time.
